

Route planning just got a whole lot easier.

Welcome to ZENNO

What is ZENNO?

ZENNO is OPSI's revolutionary online and mobile planning, routing and workflow management system.

It simplifies your scheduling and takes all the speed bumps out of planning your logistics. Schedule your delivery, sales and service teams efficiently, effectively and in real-time.

How does it do it?

ZENNO has an intuitive and easy-to-use interface, accessible anytime, anywhere by any user with an Internet connection - zero installation, zero fuss.

We give the user complete control over the schedule with drag-and-drop functionality, detailed data grids with customer, client, vehicle and driver information.

Vehicle	Driver	Trip	Shift	Depot	Duration	Start	Est. Start	Shift Start	Shift End
ABC 123 GP	Mike Michaelson	2014-11-13 07:00-01...	ABC 123 GP - Mike M...		512m	07:00 13 Nov		07:00 13 Nov	19:00 13 Nov
ABC 123 GP	Mike Michaelson	2014-11-13 15:32-12...	ABC 123 GP - Mike M...		120m	15:32 13 Nov		07:00 13 Nov	19:00 13 Nov
DEF 456 GP	Barry Barrington	2014-11-13 07:00-30...	DEF 456 GP - Barry B...		305m	07:00 13 Nov		07:00 13 Nov	19:00 13 Nov

Regardless of your operating environment, our robust tagging system lets you model the details and specifics of your staff and vehicle requirements – ZENNO checks for these tags to ensure you always get the right driver and vehicle to the right location.

But what about the scheduling itself? Go from Working to Well Done with a single-click: our automated scheduler will take all your jobs and assign them to the best resources and arrange them in the optimal sequence for improved productivity and reduced travel costs, resource utilisation

The ZENNO dashboard gives you the bird's eye into your operations, letting you quickly identify potential hitches as they occur.

And how do I keep track?

Keeping an eye on schedules is difficult at the best of times, which is why ZENNO has been designed for ease of use in mind.

ZENNO syncs real-world activity back to the plan, allowing you to compare what's actually happening on the ground to your schedule side-by-side and make on-the-fly adjustments to your schedule.

GPS tracking is seamlessly integrated with the map, allowing you to track your resources movements at all times.

ZENNO's dashboard provides a minimal fuss and maximal information for your controllers, keeping their finger on ETAs, driver's current and future activity, notes, messages and communications.

More control, more visibility, more time. Just more.

ZENNO is accessible from any device with an internet connection and browser - check on your schedule wherever you are.

ZENO

What about on the road?

Your mobile staff can benefit as well with our **ZENO.Mobile**, our workflow management mobile app.

ZENO.Mobile is the companion to the flexible schedule management of ZENO: A configurable app for your staff that automatically updates with their tasks and deliveries for the day and keeps them in the loop with your planning team.

ZENO.Mobile helps ensure strict adherence to work and documentation related activities while on duty, allowing your staff to focus less on administration and more on service excellence.

ZENO.Mobile is there to assist your staff in all their activities with built-in navigation, on-device signing, photo functionality, notifications of changes to their schedule and more.

ZENO.Mobile comes with a workflow editing tool for creating your own specific processes, delivery and service procedures for your staff to follow.

It all ties together, giving you real-time control over your schedule, a direct view into your staffs' actions and giving your customer accurate and valuable feedback about the status of their orders and service requests.

 **Compliant with all Android devices**

The **ZENO.Mobile** app, combined with the administrative backend and **ZENO.Mobile's** workflow editor, keeps you in control at every level of your logistics.
